C100: deviations (data − conjecture)/error, 80 bins
mean power
index of the cosine transform k (frequency u = k/8)
u_c
random samples
classes D mod 840
consecutive bands
6,074 L from m pieces (m = 6,074: random)
400 samples per point, ±1 error
power at k = 1 ... 7
number of consecutive pieces m
B10
C100
first run: 60 / 150
