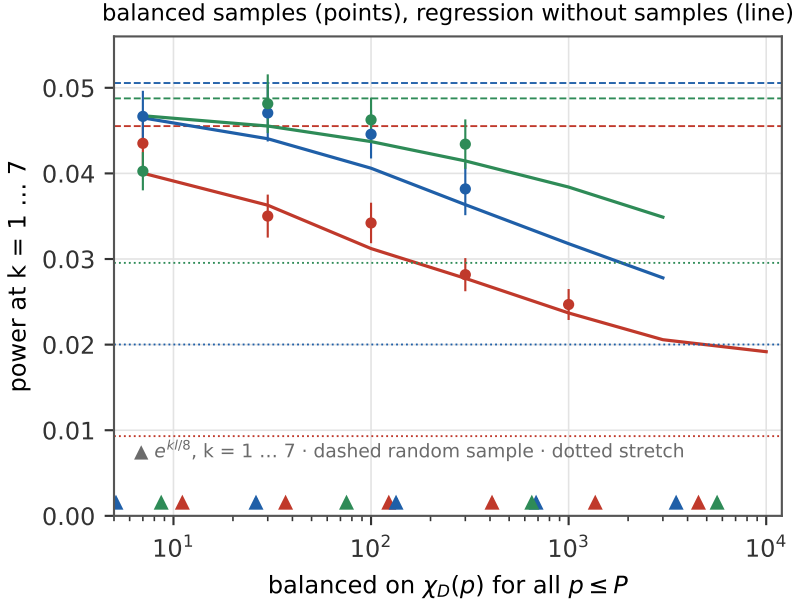
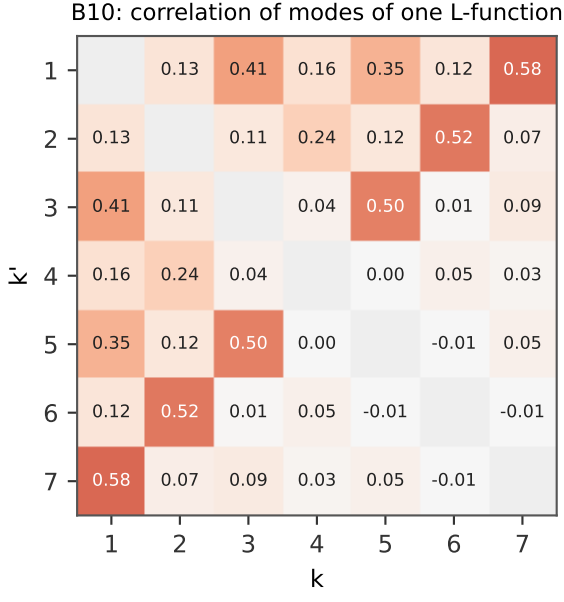
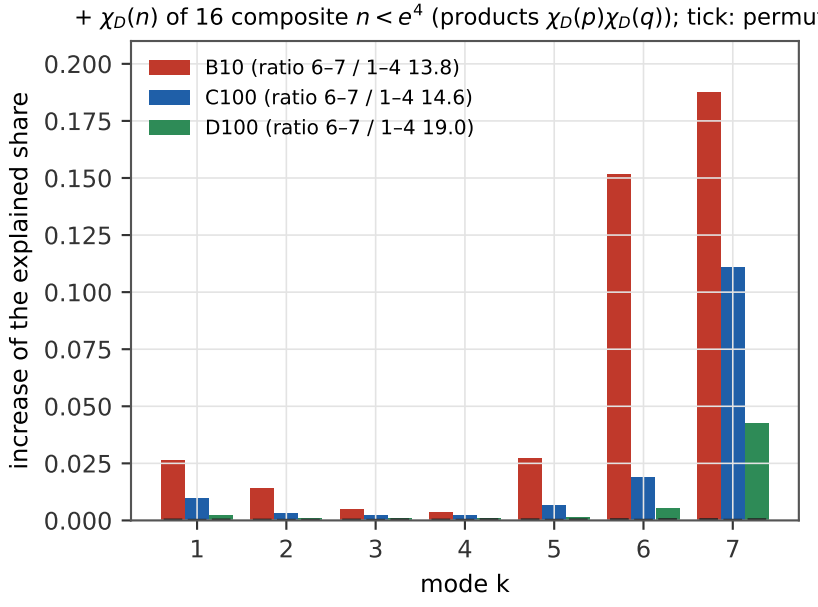
pieces: layer 0 (line), layers (filled), draws only (open)
power at k = 1 … 7
length of the piece l (consecutive D)
B10 (l = 9.6)
C100 (l = 13.1)
D100 (l = 17.3)
stretch



balanced samples (points), regression without samples (line)
power at k = 1 … 7
balanced on $\chi_D(p)$ for all $p \le P$
▲ $e^{kl/8}$, k = 1 … 7 · dashed random sample · dotted stretch



B10: correlation of modes of one L-function
k'
k



+ $\chi_D(n)$ of 16 composite $n < e^4$ (products $\chi_D(p)\chi_D(q)$); tick: permuted
B10 (ratio 6–7 / 1–4 13.8)
C100 (ratio 6–7 / 1–4 14.6)
D100 (ratio 6–7 / 1–4 19.0)
increase of the explained share
mode k
